### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM \ THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Claim Rejections - 35 USC § 112***

Claim 6 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The fastening of more than one edge of the fabric material to the building has not been adequately disclosed.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1,3 and 6-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hillstrom in view of Phillips.

Hillstrom discloses a banner attached to the exterior of a building, the banner being made of "any appropriate material", which clearly includes a fabric. The banner is removably attached so that it can be changed easily, column 2 lined 29-33. It is attached to an eave at the roof line of a fast food restaurant. What is not shown are the hook and loop fasteners. However, hook and loop fasteners for mounting sheets of decorative fabric is well known, as illustrated by Phillips at 18,20,22,28. It would have been obvious to replace the mounting means of Hillstrom with that of Phillips so as to render changing of the banner easier. The strip 18 is sewn to the fabric, column 2, line

58, and it would have been obvious to attach the other portion of the hook and loop fastener to support 24 via adhesive since such does not require mechanical fasteners as well as provides a continuous connection. The size of the hook and loop strip is clearly an obvious design choice depending on the size of the banner.

Regarding claim 6, as best understood, it would have been obvious to provide Velcro™ to vertical end sides of the banner in Hillstrom so as to prevent flapping of the banner due to wind.

### ***Response to Arguments***

Applicant's arguments have been fully considered but they are not persuasive. Applicant maintains that Hillstrom and Phillips do not teach or suggest using Velcro™ in an exterior application as recited. However, the fastener of Phillips is the same fastener used by Applicant and consequently capable of being used outdoors. Further, there is nothing in the description of the fastener in Phillips that would suggest that it is not usable outdoors. Hillstrom is concerned with providing a changeable system for supporting banners, signs, etc., and if he were looking for a fastener that would render the banner more easily changeable, he would have naturally looked to other fabric fastening means and would not limit himself to only outdoor fastening means. If an interior fastening means were not "heavy" enough for external applications, merely providing a stronger, more durable, etc., version of the fastener, in this case Velcro™, would have been obvious.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
